

Wärtsilä Vessel General Permit (VGP) 2013 compliance packages for Transverse Thrusters with fixed pitch propellers

The Wärtsilä Vessel General Permit 2013 (VGP) transverse thruster compliance package for fixed pitch propellers (TT-FT) responds to the legislation, which introduces new environmental regulations for vessels operating in US coastal waters.

A compliance package has been developed for the Wärtsilä transverse thrusters types mentioned in this document. The package is applicable for transverse thrusters with a fixed pitch propeller.

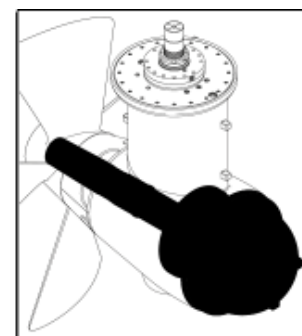

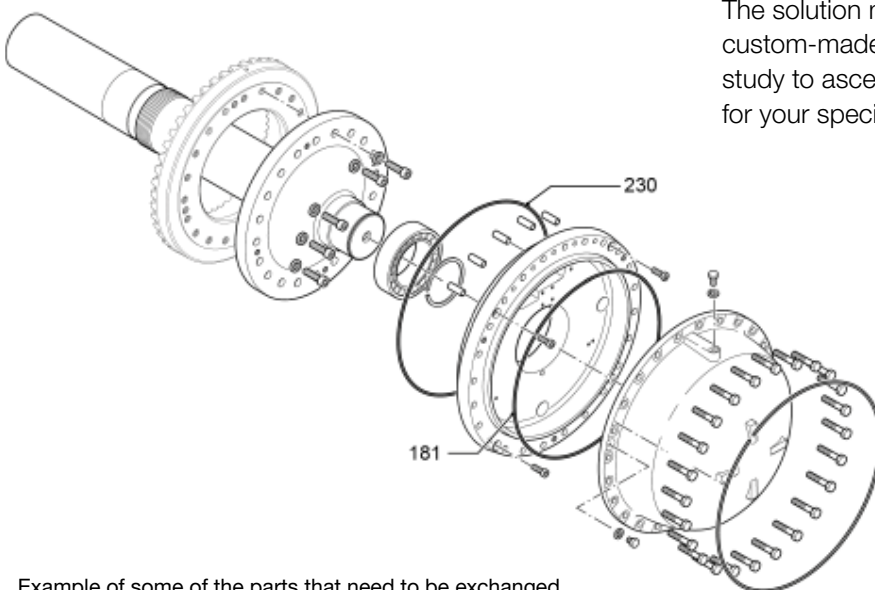

EASY INSTALLATION

The compliance package can be installed during the next scheduled dry dock or at the earliest opportunity. The package can also be included in the dock maintenance plan. Once the package is installed the transverse thruster is VGP 2013 compliant and the vessel may sail in US coastal waters.

The compliance package is available for the following propeller types:

- TT-FT125
- TT-FT150
- TT-FT175
- TT-FT200
- TT-FT225
- TT-FT250
- TT-FT275
- TT-FT300

The solution might not be technically applicable for custom-made TT-FTs. When needed, we will conduct the study to ascertain that the upgrade package is applicable for your specific TT-FT.
