Total EUR 623 million (591)

Review period order intake by fuel in MW

- Gas: 82%
- Oil: 18%
- IPP's: 10%
- Utilities: 43%
- Industrials: 47%
Power Plants - global order intake

Order intake 1-6/2013: 1,113 MW (1,401)
Includes all Wärtsilä power plants and other manufacturers’ gas and liquid fuelled power plants with prime movers above 5MW, as well as estimated output of steam turbines for combined cycles. The data is gathered from the McCoy Power Report. Other combustion engines not included. In engine technology Wärtsilä has a leading position.
Power Plants market trends and drivers

- GDP growth, electrification and increasing standard of living drive the growth of electricity demand
- Demand for sustainability and focus on climate change
- Rapid growth of intermittent renewable generation
- Escalating daily, weekly and seasonal demand fluctuation increases the need for flexibility
- Increasing role of gas, especially as a balancing fuel
- Ageing installed capacity drives investments in new technologies

"The world needs affordable, clean, flexible and reliable power."
Smart Power Generation is a new concept which enables an existing power system to operate at maximum efficiency by effectively absorbing current and future system load variations, providing significant savings.

Flexibility
Dynamic and flexible solutions for system balancing

Portland General Electric Company, Oregon, USA
- Operational flexibility enables quick response to variable input levels of renewable power
- Order size 220 MW

Back up generation for changes in electricity supply

Olkiluoto, Finland
- Fast starting capability with sufficient power and excellent reliability
- Order size 9 x Wärtsilä 32 engines

Efficient and economical peaking plants

South Texas Electric Cooperative, USA
- Quick start-up, superior load following and low water consumption
- Order size 225 MW

Efficient gas based generation in the utility markets

Azerenerji, Azerbaijan
- Utility scale fast track project
- Largest and most efficient gas engines in the market
- Order size 38 MW
We are passionate about optimising lifecycle value by offering what our customers need. We deliver on this promise through the only true total offering of marine products, integrated solutions and services in the industry – worldwide.

We help our customers find the shorter route to robust growth and bigger profits by focusing on operational efficiency, environmental excellence, fuel flexibility and services.

Ship Power market
Market position of Wärtsilä’s marine engines

Medium-speed main engines

- Wärtsilä: 47% (48)
- MAN D&T: 18% (19)
- Caterpillar: 10% (4)
- Others: 25% (29)

Total market volume last 12 months: 4,850 MW (4,691)

Low-speed main engines

- Wärtsilä: 14% (15)
- Mitsubishi: 1% (2)
- MAN D&T: 85% (83)
- Others: 96% (96)

Total market volume last 12 months: 13,214 MW (9,569)

Auxiliary engines

- Wärtsilä: 4% (4)
- Others: 96% (96)

Total market volume last 12 months: 3,800 MW (3,728)

Wärtsilä’s market shares are calculated on a 12 months rolling basis, numbers in brackets are from the end of the previous quarter. The calculation is based on Wärtsilä’s own data portal.
Development of the global economy drives marine trade and transportation growth

Development of oil & gas prices stimulates investments in exploration and production of offshore oil & gas

Environmental regulations drive demand for environmental solutions and gas as a marine fuel

Increasing focus on energy efficiency and environmental performance

The development of efficient vessels, environmental solutions and gas technology will be our priority in meeting the evolving needs of our customers.

Services market trend and drivers

- Development of installed base and fleet utilisation
- Increased focus on total cost of ownership and lifecycle efficiency
- Changes in environmental regulations
- Growth of gas as a fuel in shipping and in power generation
- Outsourcing of operations and maintenance in service markets
- Accelerating technological development and cost pressure increases demand for expertise
Market outlook

• **Power Plants:** The overall market for natural gas and liquid fuel based power generation in 2013 is expected to be similar to that of 2012.

• **Ship Power:** The outlook for the shipping and ship building market in 2013 is cautious, although market conditions are expected to be better than in 2012. The contracting mix is expected to be largely in line with that seen in 2012, favouring contracting in the offshore and specialised vessel segments.

• **Services:** The overall service market outlook remains stable.
Prospects for 2013 unchanged

Wärtsilä expects its net sales for 2013 to grow by 0-10% and its operational profitability (EBIT% before non-recurring items) to be around 11%.
