Do you want to be sure your trawlers go the distance, time after time? With minimum disruption and maximum efficiency?

Whether you have oil or water lubricated shaft lines, Wärtsilä offers a full range of seals and bearings systems, packages and products to keep your business running smoothly.

**Future solutions for fishing vessels**
Fishing owners and operators are looking for more advanced solutions that can quickly pay for themselves by lasting longer, preventing expensive emergency dockings and downtime in harbour, and avoiding leakages and the associated costs.

At the same time, owners also need extremely fast responses for seal and bearing deliveries. To meet the demand, Wärtsilä is taking a more lifecycle oriented role as your service provider.

As a truly global organization, Wärtsilä offers you a broad range of products and services covering the whole lifecycle of your vessel. We lead the way in technological innovation and are constantly developing new products, helping ensure you can call on an environmentally sound solution that always complies with the latest regulations.
A complete package of solutions
Wärtsilä Seals and Bearings provides complete stern tube packages or component supplies for all your requirements. Whether you have oil or water lubricated shaft lines, we have the products and services to deliver. Our solutions are designed to ensure smooth and continuous operation of your vessel or fishing fleet, even in the most challenging environments.

Wärtsilä Sea-Master. Future proof your performance and compliance
Our condition monitoring system, the Wärtsilä Sea-Master provides the evidence you need to extend the standard 5 yearly docking intervals, and keep your vessel in the water for longer.

Choose reliable parts every time
Wärtsilä seals & bearings are designed to improve lifecycle cost management, with a range of high level, technologically advanced products delivering a longer service life.

- More advanced, higher level seal technologies reduce risks and improve reliability and resistance against damage caused by impurities or debris in the water
- With the most comprehensive product portfolio, you know we always offer the solution you need, not the one that we want to sell
- Increasing environmental legislation heightens the need for highly reliable seals – we understand the global and local legislation and can supply parts that meet the highest standards of reliability
- Wärtsilä’s hydrodynamic experts tailor the propeller and nozzle for each application to achieve the optimum balance between fuel consumption and comfort levels, taking into account the wide range of demanding operating conditions

Ensure low maintenance for years to come
Extra downtime can cost your fishing business and your reputation. Our technical know-how and our innovative solutions mean that your vessels can keep running for longer.

- We can deliver the entire stern tube installation as a ready-to-mount package, making installation faster and keeping downtime to a minimum
- We offer lifecycle services for your parts, ensuring they keep working at optimum performance for years to come

Know spares and support are always available
Your schedules are tight and there can be no delays. Our global presence means we can deliver spare parts and service extremely quickly, helping you avoid any unnecessary harbor time.

- Wärtsilä Propulsion Shaft Line Portfolio is the most comprehensive in the market
- We continually develop innovative, environmentally compliant and longer-lasting new products

Wärtsilä is a global leader in complete lifecycle power solutions for the marine and energy markets. By emphasizing technological innovation and total efficiency, Wärtsilä maximizes the environmental and economic performance of the vessels and power plants of its customers.
